

## Appendix B: Stoma Care Accessory Products Prescribing Guidance

The aim of this guidance is to:

- Provide some basic information to prescribers and other healthcare professionals on the use of stoma care accessories
- Assist in the prescribing decisions of stoma care products in primary care.
- All stoma appliances expected to be initiated by stoma specialist and there for AMBER on the formulary

This guide provides a list of the most clinically cost effective stoma care products within each product group as listed in the Drug Tariff.

Suggested prescribing quantities have been indicated where possible. Pricing information has been taken from the Drug Tariff May 2017.

The products highlighted in **BOLD** are identified as offering best value in terms of clinical efficacy and cost effectiveness.

Colorectal Nurse Specialists are available to assess and reassess all stoma patients and make recommendations for the best management of the individual. They are available for consultation where any problems in stoma management arise.

*Colorectal Nursing Service Contact Details: see Stoma Toolkit 2017*

Original July 2011 (amended Dec 2013, May 2017)

Prices may fluctuate on a monthly basis, the most up to date pricing information can be found via Drug Tariff, accessible online via

Adhesive Flange Extenders/strips						
Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
Coloplast Ltd	Brava elastic tape	20 strips	12070	£13.10	<p>Security frames (sometimes called flange extension or retention strips) offer additional security to an appliance, by providing a reliable and effective way to secure a pouch, and to prevent leaks.</p> <p>These are hydrocolloid based products and used to secure bags or flanges to the skin where patient requires added security or used to reinforce seals in patients with leakage problems.,</p>	<p>Plasters often cause allergic skin reactions and may leave adhesive residue</p> <p>Individuals currently receiving prescriptions for adhesive discs, rings pads or plasters should be referred for review to stoma nurse specialist as there is a very limited role for use of these products.</p> <p>The selected products listed are more appropriate and should replace adhesive tapes and plasters etc.</p>
Clini Med Ltd	<b>HydroFrame extenders</b> Hydroframe flange extenders	<b>30 strips</b> 20	<b>WAF M33</b> WAF H33	<b>£10.37</b> £13.52		
Pelican Healthcare Ltd	Pelican Contour Flange Extender	30	130860	£20.16		
Salts Healthcare	Secuplast Aloe	30	SPHA2	£13.31		

Adhesive Removers (AR) Sprays/Wipes						
Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
Salts Healthcare	WipeAway Adhesive Remover	50ml aerosol	TR101	£6.63	Adhesive removers are used to facilitate removal of any adhesive residues & to reduce skin trauma on removing appliance. There are 3 types of adhesive removers (ARs) - silicon based oil based & alcohol based and available in 2 types of application device - sprays & wipes. Formulary choices are all silicone based products. Wipes may be more useful for the elderly and/or individuals with reduced or limited dexterity or where problems of excess adhesive residue exist.	Sprays are suitable for general use and usually more cost effective to prescribe. Only products considered to be price equivalent are included.  All silicon based adhesive remover products are interchangeable without compromise to patient care.
Coloplast Ltd	Brava Adhesive remover	50ml spray	12010	£9.17		
CD Medical	Peel-Easy	50ml aerosol	300714	£7.10		
Respond Healthcare Ltd	OstoMart OstoCLEAR	30 sachets	MRW1	£9.23		

Odour Neutralising + Lubricating products						
Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
Respond Healthcare Ltd	OstoZyme Multi	300ml	TCB6	£8.08	Used for problems of pancaking in patients with poor dexterity. Pancaking causes leaks of stoma output between the flange and skin leading to excoriation of the skin around stoma site and can be uncomfortable and messy to change.	Pancaking is a term used to describe where the stoma output collects around the stoma instead of going down into the bag, It can occur when there is not enough air in the bag to allow output to go down to the bottom of the pouch. A few drops of oil e.g. baby oil &/or covering the filter with filter covers supplied in each box of stoma bags can help prevent problems of pancaking.
Coloplast Ltd	Coloplast Brava Lubricating Deodorant	240ml	12061	£8.46		
Respond Healthcare Ltd	OstoMart OstoZyme Odour Neutralising	30 x 8ml	TCB3	£6.76		
Skin Powders						
Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
Conva Tec Ltd	Orabase Paste	25g	S103	£2.14	Powders are sprinkled around the stoma to heal sore weepy or wet peristomal skin and enable adherence of stoma appliances. Usually only used for ileostomy and sometimes urostomy patients. The Ostomart powder has Aloe Vera incorporated into powder. Patients should only require 1 powder every 2 months as they should be used liberally.	If a patient is continually receiving repeat prescriptions for powders they should be referred for review by stoma specialist nurse.
Coloplast Ltd	Brava Ostomy Powder	25g	1907	£2.43		
Hollister Ltd	Adapt Stoma Powder	1	7906	£2.65		

Skin Barrier Wipes & Sprays						
Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
Salts Healthcare	Peri-prep sensitive no sting protective wipe	30 sachets	PPS1	£15..47	Barrier wipes & sprays protect the skin from the corrosive effects of stoma output. All the wipes listed apart from Salts periprep wipes are silicon based. Oil and alcohol based wipes are no longer recommended as barrier wipes of choice.	All silicon based barrier wipes are interchangeable without compromise to patient care. Peri-prep wipes PPS1 is a patented water based wipe and offers an alternative cost effective non silicon based barrier wipe option but as it contains a small amount of alcohol to facilitate evaporation it should not be used on very sore or excoriated skin.
Coloplast Ltd	Brava Skin barrier wipe	30 sachets	12021	£21.80		
	Brava Skin barrier spray	50ml	12020	£11.48		
Respond Healthcare Ltd	OstoMart OstoGuard No sting protecti skin barrier film	30	RMC3	£21.01	Cavilon has not been included at present, although there is a stoma wipe available. Patients may already be using a product that suits their skin, so consider this when changing repeat prescriptions.	
Skin barrier creams						
Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
CliniMed Ltd	LBF barrier cream	30g	3823	£3.35	Creams if used as an alternative to barrier wipes for sore skin should be applied around stoma, left for 2 minutes then wiped off to prevent failure of adhesive. Barrier creams sachets may be more cost effective to prescribe as tubes of cream can work out to be more expensive due to the amount of product waste. Cavilon barrier cream is not suitable for use as barrier protection for stoma patients. Barrier creams are also used for patients that have had ileo-anal pouch surgery for post-op care.	
Respond Healthcare Ltd	OstoMart OstoGuard Barrier Cream sachets	20	RMC2	£8.20		
Respond Healthcare Ltd	OstoMart OstoGuard Barrier Cream	60g	RMC1	£4.95		
Skin Pastes & Fillers						

Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
Conva Tec Ltd	Stomahesive paste	60g	S105	£7.74	Pastes are used to fill skin dips and creases around stoma sites to secure pouch to prevent leakage. They are particularly used for problematic stomas and fistula care.	Use will depend on the depths of skin folds etc but prescription requests for more than 2 x 60g tubes per month should be reviewed. Product choice is under advice from stoma specialist nurses.
Salts Healthcare	Cohesive paste	60g	SP60	£3.85		
Dansac Ltd	Soft paste	50g	77550-0	£3.71		
<b>Seals (washers) – Continued over page</b>						
Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
These products should only be prescribed under the recommendations and supervision of a stoma nurse specialist. Product List is as specified in drug tariff.					Seals and washers are used on peristomal skin that has crevices, fistulas or scar tissue making skin surrounding stoma uneven. Used in patients with problems of leakage are due to either a difficult sited stoma (eg in a skin fold) or recessed or flat stomas (ie stomas flush to the skin).  Off centre seals are available from Dansac that are not on this guide, please seek advice from your local stoma/colorectal nurse. (please see misc)  Large seals are particularly indicated in the care of fistula management.	The choice of product is generally governed by the type of problem causing the leak. Seals and washers are easily mouldable to all the body contours to ensure increased comfort and fit. Some seals are available in a convex range for stoma that is in dips/creases to help prevent leakage problems.
Hollister Ltd	Adapt barrier rings 98mm	10	7806	£22.74		
	Adapt barrier rings 48mm	10	7805	£18.05		
	Convex barrier ring (17-26mm)	10	79520	£18.15		
	Convex barrier ring (27-36mm)		79530	£18.15		
	convex barrier ring (37-46mm)	10	79540	£18.15		
	Adapt oval convex rings (22-38mm)	10	79601	£19.07		
	Adapt oval convex rings (30-58mm)	10	79602	£19.07		
	Adapt oval convex rings (38-56mm)	10	79603	£19.07		
Coloplast Ltd	Brava Protective Seal 2.5mm (18-48mm)	30	12035	£57.90		
	Brava Protective Seal 2.5mm (27-57mm)	30	12037	£60.00		
	Brava Protective Seal 2.5mm (34-64mm)	30	12039	£61.20		

Stoma Care Accessory Products Prescribing Guidance

	Brava Protective Seal 4.2mm (18-48mm)	30	12045	£58.80		
	Brava Protective Seal 4.2mm (27-57mm)	30	12047	£61.80		
	Brava Protective Seal 4.2mm (34-64mm)	30	12049	£63.30		
Salts Healthcare	Secuplast Mouldable Seals Thin	30	SMST	£50.90		
	Secuplast Mouldable Seals Standard	30	SMSS	£51.71		
	Secuplast Mouldable Seals Large	30	SMSL	£23.16		

Discharge Solidifying Agents						
Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
Opus Healthcare	Absorbagel sachets	150	9900	£46.31	These are thickening agents designed to absorb moisture from stoma output thereby reducing likelihood of leakage and reducing frequency of pouch emptying. Liquid stools have increased tendency to leak.  Discharge solidifying products are considered to be interchangeable.	Their use should be reserved for those patients with high or excessive watery output in high output ileostomies unresponsive to drug treatment strategies and dietary measures to control excessive fluid loss. Loperamide capsules or codeine should be considered first line measures to try in the control of diarrhoea or excess fluid loss in stoma patients as it offers a more cost effective prescribing option. Methylcellulose (celevac) tablets are also licensed for use in the control of colostomy and ileostomy output. Methylcellulose is a hydrophilid colloid which absorbs water causing it to swell to a soft gel of uniform consistency.
C S Bullen Ltd	Absorbian Sachet Plus	30	UFAS-02	£7.82		
Respond Healthcare Ltd	OstoMart OstoSorb 3g sachets	30	PFW5	£9.89		

Filters & Bridges						
Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
Opus Healthcare	ClearWay Stoma Bridge	30	7700	£10.23	Stoma bridges can help the stool to drop to the bottom of the pouch, thus helping to prevent 'pancaking' for colostomy patients	Patients using some of these older products should be considered for review by stoma nurse specialist
Miscellaneous Items – Continued over page						
Manufacturer	Product	Qty/Pk Size	Order No	Cost/Pk	Indications for use	Comments
Dansac Ltd	Seal (off centre)				These seals have an off centre hole, suitable for problematic stomas, increased absorbancy properties, so effective in wet areas.	
	20mm	30	070-20	£68.29		
	30mm	30	070-30	£68.29		
	40mm	30	070-40	£68.29		
	50mm	30	070-50	£68.29		
Salts Healthcare	Dermacol				Dermacol is a collar that helps to provide a leak-proof barrier around the base of the stoma, helping prevent output from coming into contact with the skin. Dermacol is suitable for use with all types of appliances.	
	Up to 20mm	30	DC20	£57.67		
	23mm	30	DC23	£57.67		
	26mm	30	DC26	£57.67		
	29mm	30	DC32	£57.67		
	32mm	30	DC35	£57.67		
	35mm	30	DC38	£57.67		
	38mm	30	DC41	£57.67		
Coloplast Ltd	Protective sheets				Protective sheets are used to protect peristomal skin for problematic stomas and fistula management. The appropriate size should be used to prevent wastage.	
	100x100mm	10	3210	£24.80		
	150x150mm	5	3215	£29.70		
	200x200mm	5	3220	£54.04
